# Wyze Camera Settings for Glowforge Timelapse

Set up camera following directions in box

Insert SD card
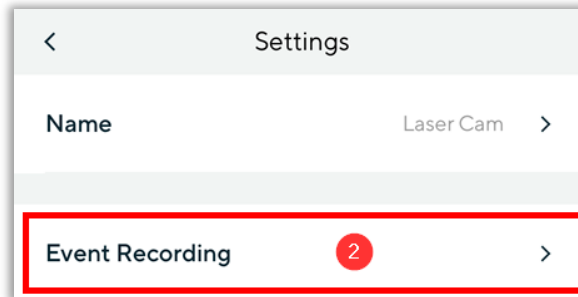

Open Wyze app and open camera

Open **Settings** (1) Icon

In **Settings** Menu Open **Event Recording** (2)

In Event Recording Menu (3)

Detects motion   Off
Detects sound   Off
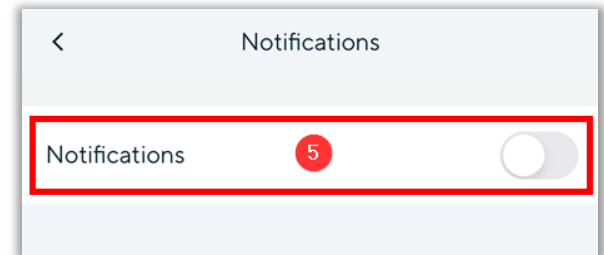

Return **back** one screen
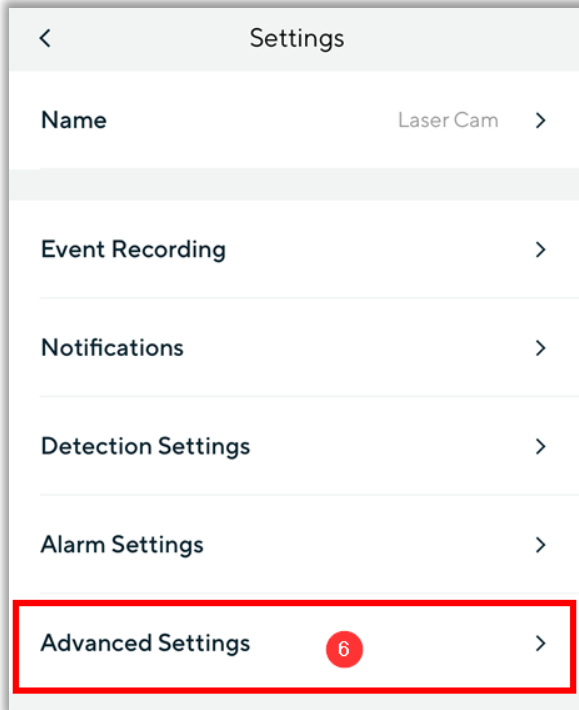

In **Settings** Menu Open **Notifications** (4)

In Notifications Menu
Notifications (5)   Off
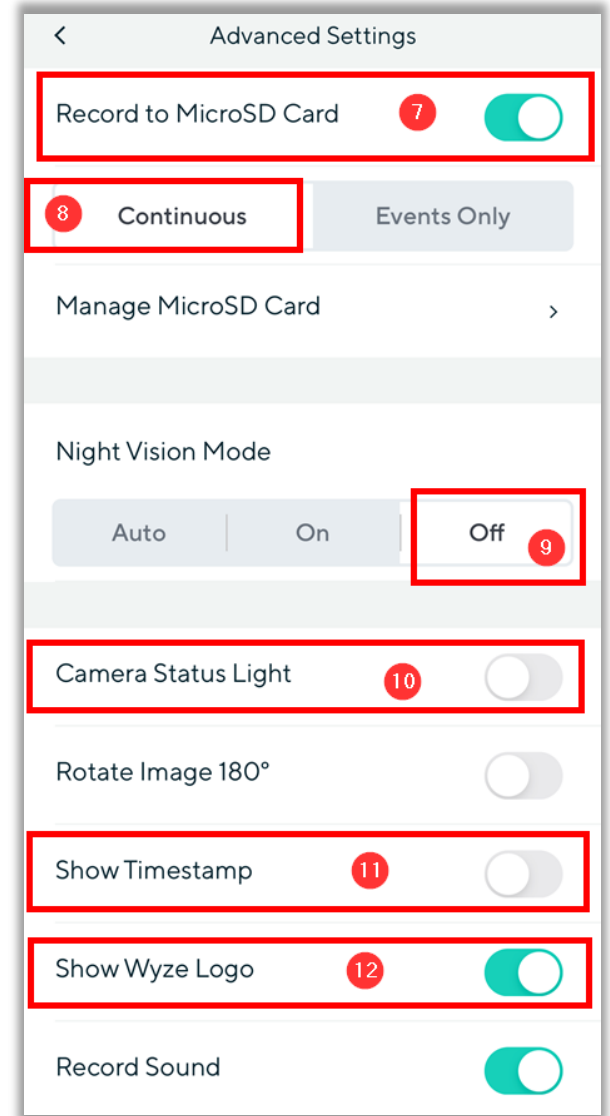

Return **back** one screen

In **Settings** Menu Open **Advanced Settings** (6)
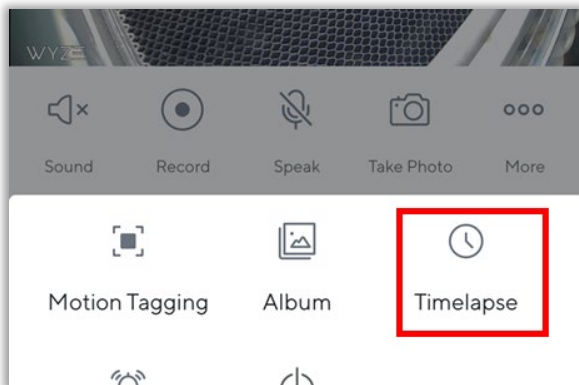

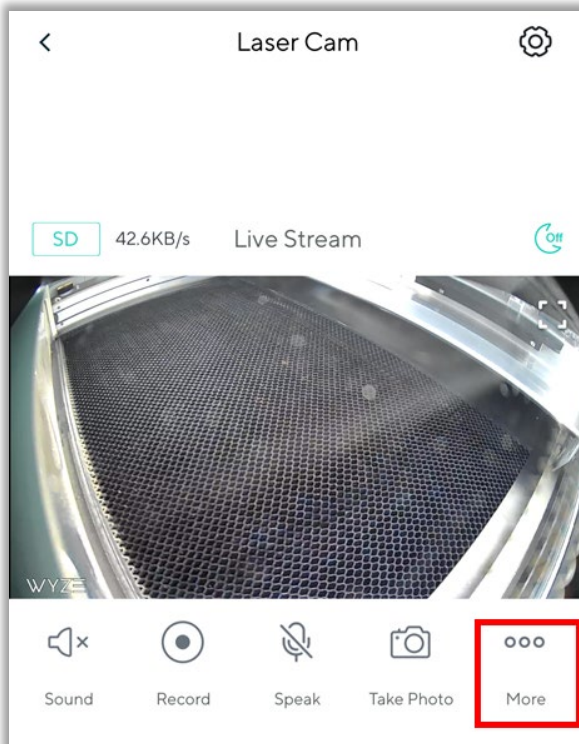

Settings	
Name	Laser Cam >
Event Recording	>
Notifications	>
Detection Settings	>
Alarm Settings	>
Advanced Settings (6)	>

In <u>Advanced Settings</u> Menu

Record to MicroSD Card (7)	On
Continuous (8)	Selected
Night Vision Mode (9)	Off
Camera Status Light (10)	Off
Show Timestamp (11)	Off
Show Wyze Logo (12)	Personal Preference
Record Sound	On

Return **back** two screens to view camera

Start Wyze Glowforge Timelapse

Open **More** menu and open **Timelapse**

Adjust **Interval** and select **Set**

Note: For short jobs, I like the minimum value of 3 seconds.
For jobs running longer than an hour, you may want to adjust this to 5 or 6 seconds
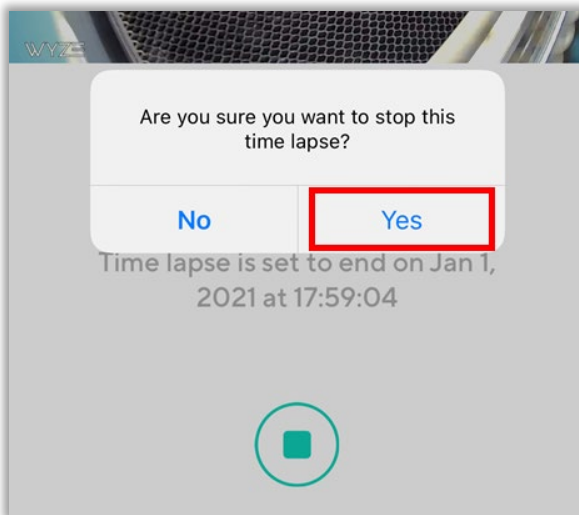

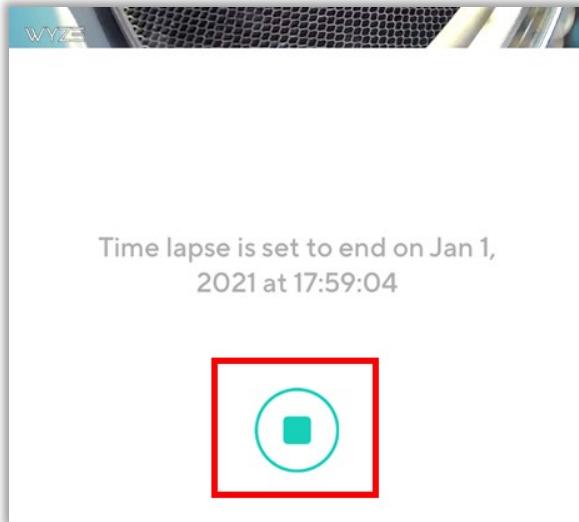

Start Glowforge cut. Timelapse is recording.

You may return **back** one screen while your job runs to watch for flame, or you may close the app entirely
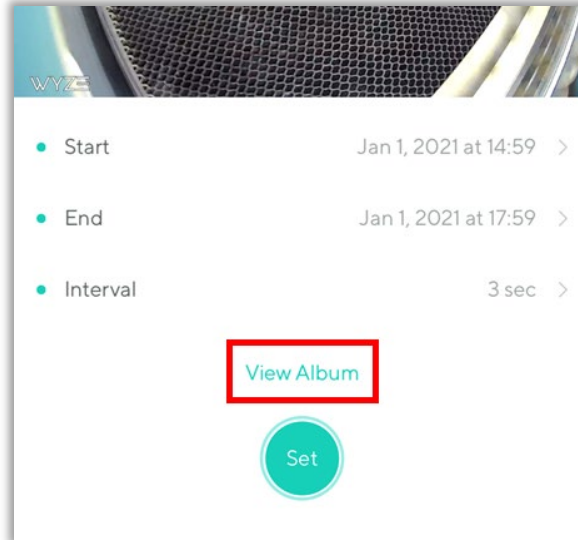

End Wyze Glowforge Timelapse and Retrieve Files

To stop timelapse, open camera, **More**, **Timelapse**
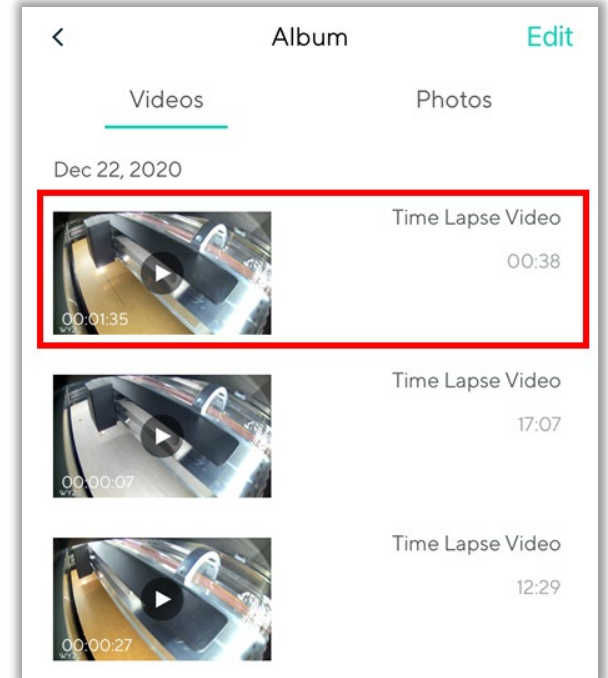

Tap the **stop** button and **Yes** to confirm

Open **View Album** to see recordings saved on the Wyze camera

Tap the recording you want and wait for it to sync over wireless to your phone or tablet

It will save to camera roll on your device where it can be edited and uploaded
